

Marty's FlexKrete Job Tips

"FlexKrete makes it possible now!"

12/5/13, VOL. VI

INCLEMENT WEATHER?

(These jobs are **EVERYWHERE**.)

WORK YEAR AROUND....INSIDE.
SHOPS, WAREHOUSES, PARKING GARAGES, DISTRIBUTION CENTERS, SHOPPING CENTERS AND MORE. Forklifts, vehicular traffic and people do not like bumps and potholes, and management does not know that YOU can fix them permanently, quickly, economically and without interruption to the business. **SHOW THEM, AND YOU HAVE BUSINESS YEAR ROUND!**

Nick Ferguson of Colorado Concrete Protection did an excellent job in showing the many advantages of FlexKrete in this shop, where there is much more work to be done.

1. Tape around the area neatly and symmetrically.
 2. Clean, and prime with FlexPrime.
 3. Screed FlexKrete evenly over area.
 4. A 1:1 slurry over the surface was then finished with a stand-up smoothing tool.
- Traffic quickly blended it to a perfect color match. Nice job, Nick!
